

# Agilent Technologies E444xA Option HS1

## Product Note

The Agilent E444xA Option HS1 consists of a single 3.5 inch floppy disk that installs write protection to all of the user directories in the E444xA Spectrum Analyzer.

To activate Option HS1 insert the floppy disk into the PSA and cycle the instrument's power. Follow the on-screen instructions which will indicate to remove the disk and cycle the power once again. This feature will remain resident in the instrument until the instrument's firmware is updated. Once the firmware is updated it will be necessary to re-install the write protection feature.

Prior to installation it may be desirable to remove any trace, screen, or instrument state data that has been stored in the user directory (C:\ drive) of the PSA. Delete all files as follows:

Press **[File] > Delete > Type > All**

Select the top file and repeatedly press the **Delete** softkey until all of the files have been deleted. Refer to page 132 of the PSA Users Guide for additional information on deleting files and directories.

---

### NOTE

User states must be saved prior to installing Option HS1.

To test the operation of the write-protect perform the following:

Press **[File] > Save > Type > Screen > Save Now**

An error should appear at the bottom of the screen "Unable to save file."

Inspect the shipping container. If the container or packing material is damaged, it should be kept until the contents of the shipment have been checked mechanically and electrically. If there is physical damage please notify the nearest Agilent Technologies office. Refer to ["Contacting Agilent" on page 2](#). Keep the damaged shipping materials (if any) for inspection by the carrier and an Agilent Technologies representative.

# Contacting Agilent

By internet, phone, or fax, get assistance with all your test and measurement needs.

This information supersedes all prior HP contact information.
