**Situation:**

The 1153A probe User's Guide does not contain Performance Verification Procedures. The 1141A probe is the same probe but with a BNC interface instead of Infiniium. Testing procedures in this manual are the same as for the 1153A.

**Solution/Action:**

**Use the testing procedures in the 1141A manual for Performance verification tests. Only change is to use an Infiniium scope in the procedures.**
