Situation:

The LCD (P/N 2090-0574) used for the 4294A was obsolete and replaced with a new LCD which employs a long-life backlight lamp. It is assumed that lifetime of old LCD's backlight will end in 2004 and after. So, when the backlight lamp of the old LCD is faulty (burned-out), replace only the lamp (P/N 5188-1364) with a new one, not whole LCD unit. This is because the old LCD (2090-0574) unit was no longer supplied and we cannot have enough number of it to replace all defective LCD units.

When the LCD itself is faulty, replace the faulty LCD with the old type LCD (use P/N 5185-3731 in place of the obsolete P/N 2090-0574) or new LCD (P/N 2090-0984) depending on the instrument serial number. (The LCD contains the backlight lamp, but the backlight lamp in the new LCD cannot be replaced independently)

The new LCD has different assembly size from old one and new replacement parts for the new LCD have been set up.

Solution/Action:

When repairing the LCD, use the appropriate replacement parts for the instruments with serial numbers shown below.

Serial Numbers: JP2KG01016 and below.

Replace backlight lamp only.

Part Number	Qty	Description
5188-1364	1	Lamp (Assembly for Sharp 8.4)

Replace whole OLD LCD units.

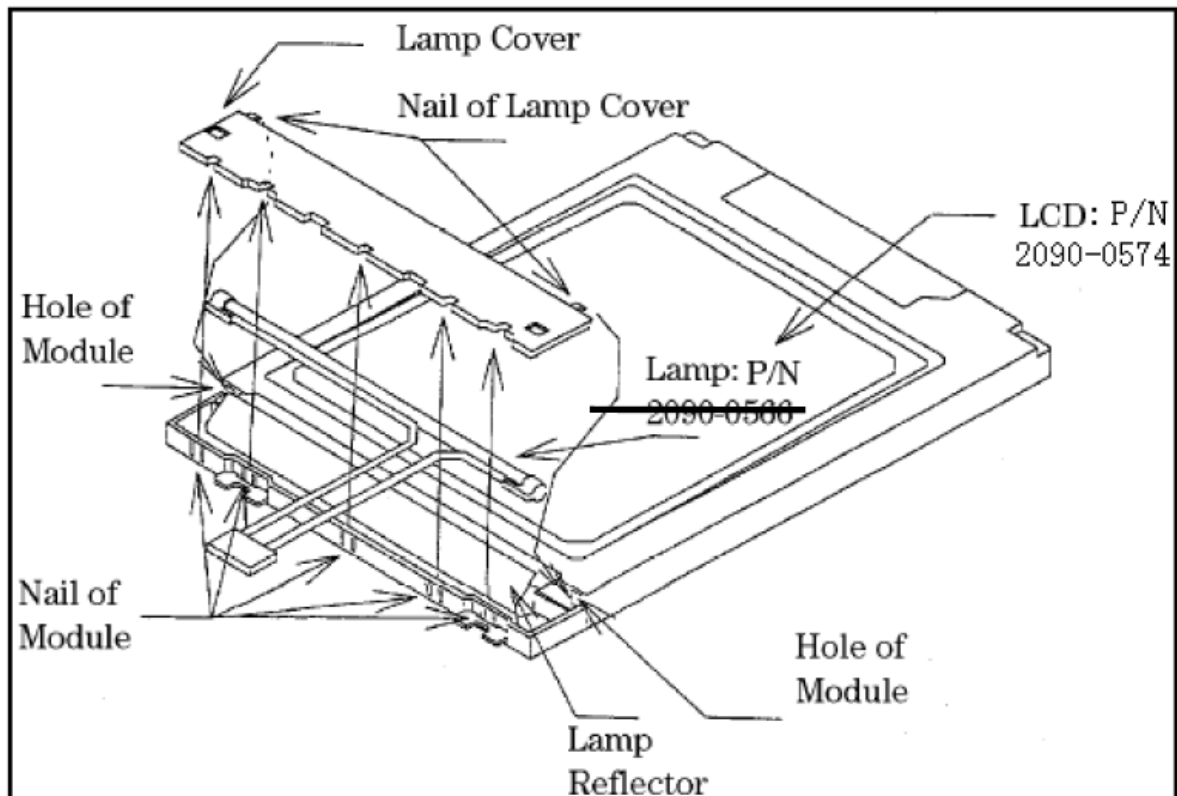

Part Number	Qty	Description
5185-3731 * 1	1	A52 LCD 8.5 inch
0950-2924 (Replaced by E4970-65001)	1	A54 Inverter
04294-04001	1	Cover
E4970-25002	1	Insulator
04294-61620	1	Cable
04294-00603	1	Case Shield
04294-60001	1	Chassis

*1: Refer to the above "Situation" part, and change only a lamp (2090-0566) if it is burnt.

Serial numbers: JP2KG01017 and above.

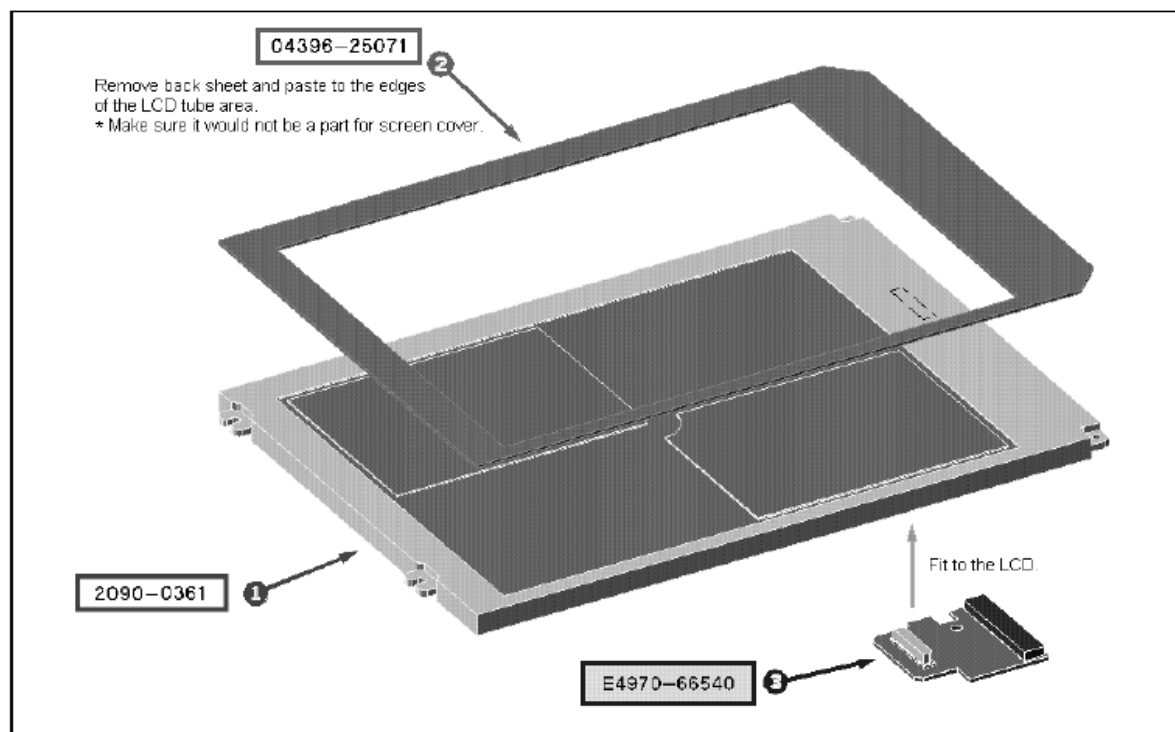

Part Number	Qty	Description
2090-0984	1	A52 LCD 8.5 inch
0950-4111	1	A54 Inverter
04294-04031	1	Cover
04352-25002	1	Insulator
04294-61623	1	Cable
04294-00607	1	Case Shield
04294-60011	1	Chassis

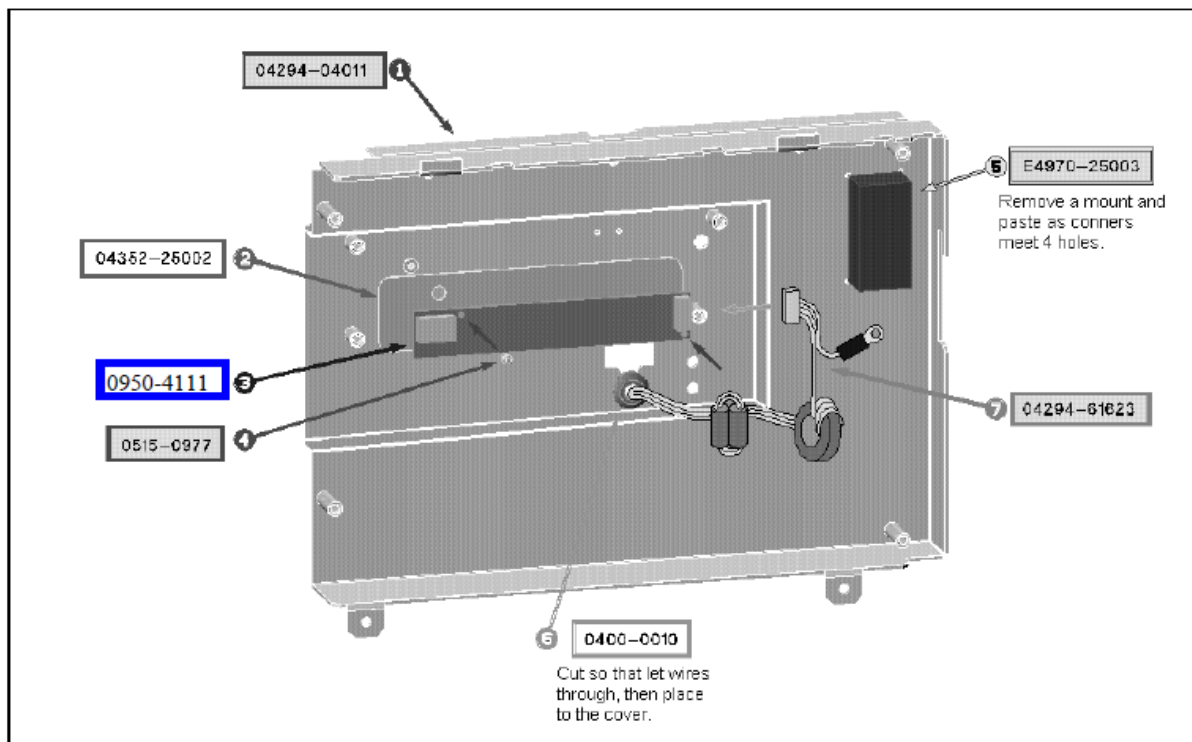

When replacing the backlight lamp in the old LCD, remove the lamp install new one as illustrated in the following figure.

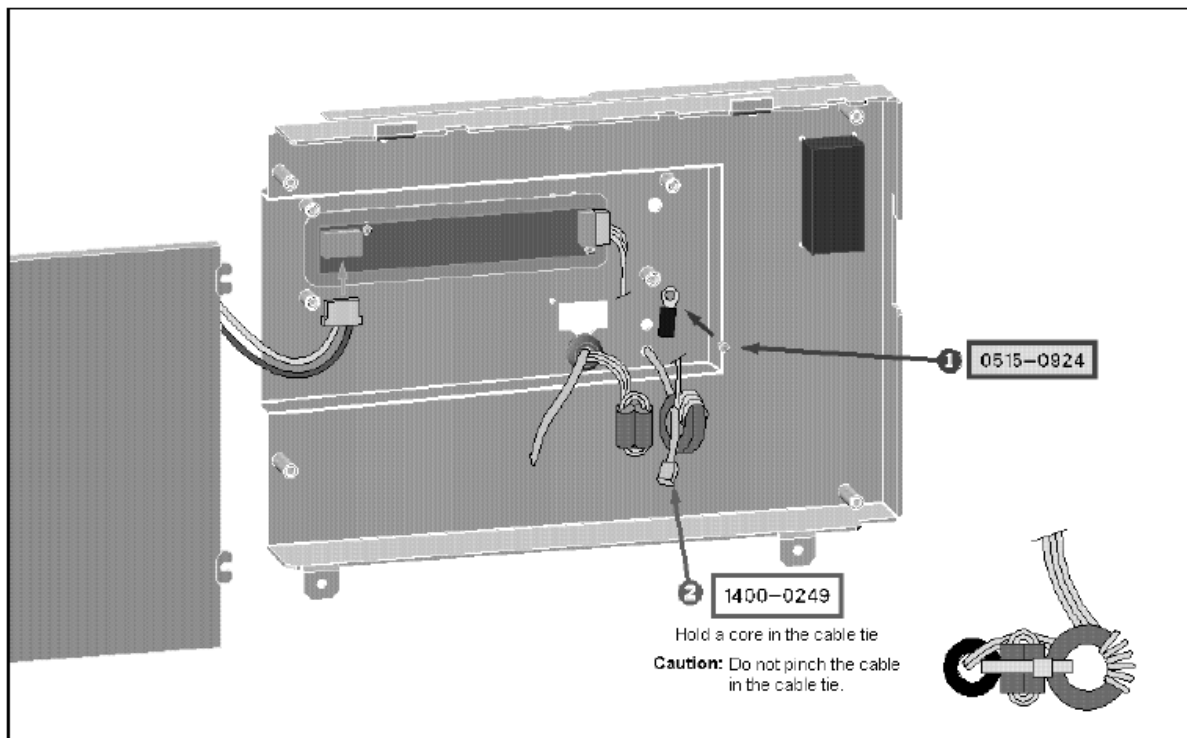

2090-0556 was replaced by 5188-1640

The procedure for the new LCD assemblies are as described below.
