Dated March 21, 1995

HP 5DX Structural Process Test System**Proper Method for Powering off the HP 5DX System****Situation / Solution:**

This is the proper power down procedure for the HP 5DX. Using this method reduces the risk of data loss or X-ray Tube damage

1. Unload any panels from the machine.
2. Select CONFIGURE from the System Access menu.
3. Select LONG TERM SHUTDOWN.
4. Select the OK box at the "Prepare system to be powered off" message.
5. Select SHUTDOWN from the System Access menu.
6. Select LONG TERM SHUTDOWN.
7. The monitor and keyboard will change to the file server computer.
