PRINTED IN U.S.A.

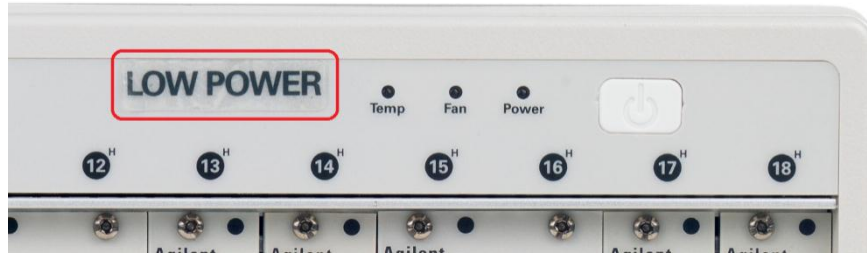

June 6, 2014

Rev. 22

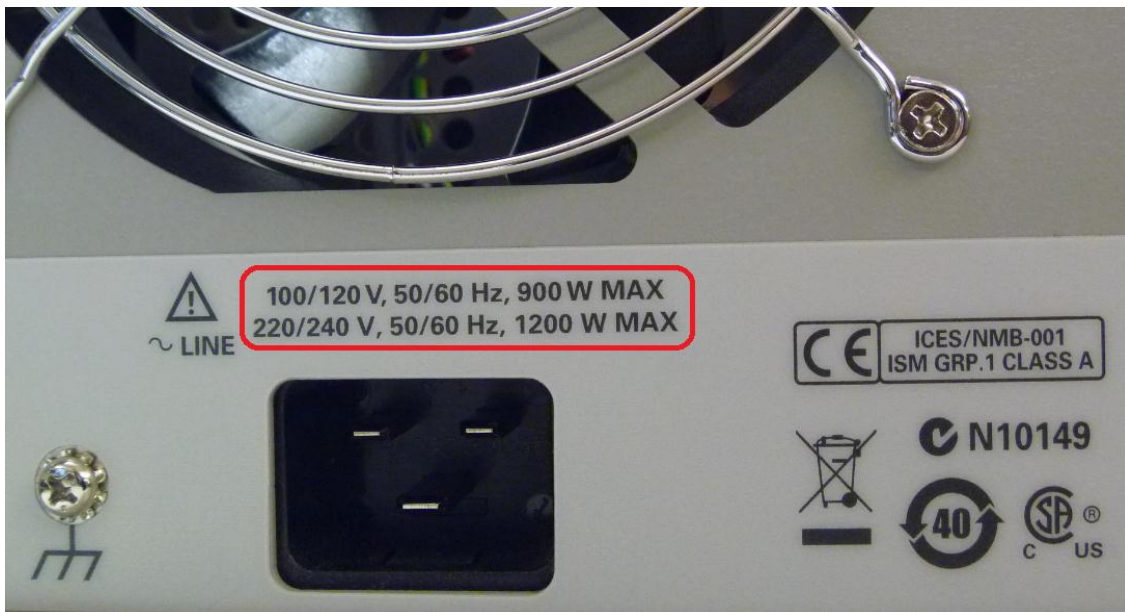

Situation:

The affected serial numbers described above may have low power rating power supplies. If the chassis has low power rating power supplies, the front panel of the chassis will have a “LOW POWER” sticker similar to picture below.

At the back of the chassis with low power rating power supply, it will have a power rating label similar to the below picture.

If the power supply was replaced/upgraded, the chassis will not have any “LOW POWER” sticker on the front panel and the back of the chassis will have power rating as shown below.

Solution/Action:

No action needed. This is just an FYI.
