Situation:

Some PNAs are experiencing reliability issues due to an intermittent electrical failure on a circuit board inside the 10 GB HDD. This can cause operating system failures to occur. These failures are eliminated by replacing the 10 GB HDD with a 40 GB HDD.

Solution/Action:

Any time a PNA with a 10 GB HDD is serviced or calibrated, replace the 10 GB HDD with a 40 GB HDD. This will help prevent future HDD-related failures.
