**Situation:**

Analyzers with the serial numbers listed on the previous page were shipped with a front panel interface board that will eventually malfunction.

**Solution/Action:**

Replace the front panel interface board. Refer to the PNA Service Guide chapter 7 section titled, “Removing and Replacing the A1 – A3 and Other Front Panel Subassemblies” for instructions on removing/replacing the assembly, post-repair adjustments/procedures, and verification/performance tests. To view this Service Guide information, use the following steps:

1. Go to <http://www.agilent.com>.
2. Enter your PNA model number (Ex: N5242A) in the Search box and click **Search**.
3. Click **Manuals**.
4. Scroll down and click on the title/hyperlink for the Service Guide.
5. When the PDF of the Service Guide is displayed, use the bookmarks in the left column to find the “Removing and Replacing the A1 – A3 and Other Front Panel Subassemblies” section in Chapter 7.
6. Follow the instructions for removing and replacing the assembly.
7. Successful completion of the post-repair adjustments/procedures and verification/performance tests will set the analyzer to its pre-repair condition. All pre-repair certification still applies.
