ADDITIONAL INFORMATION:

Situation:

Blue/white Front Panel LCD Display (below) has been obsoleted.

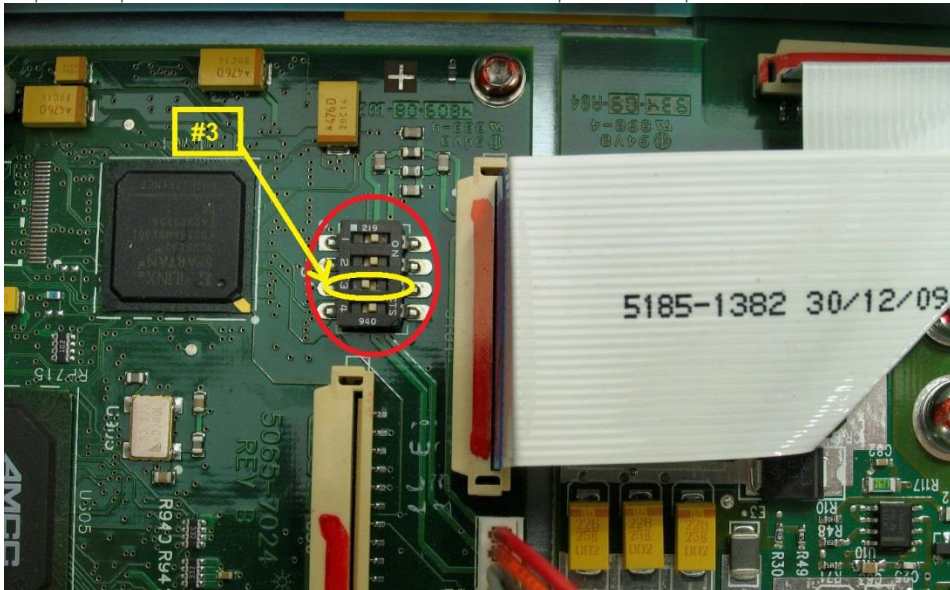

LCD (blue/white display assembly, part no. 2090-1031) has been discontinued by vendor. Replacement assembly (pictured later) is part no. 5067-5993 (amber in color). Difference in color doesn't impact any performance and specification. Unfortunately, this cannot be altered.

Solution/Action:

- 1) New LCD display (5067-5993) is a mechanical & functional “drop-in” replacement for the original.

- 2) 4-pole dip switch on PPMC PCA must have pole #3 repositioned to “off” as shown below:

- 3) Instrument firmware must be version D.04.01 or newer for proper operation of this display.
