Rev. 22

Situation:

The A26 Wideband Digital IF Assembly, p/n N9020-60257 was introduced in June 2014, and because of some circuit changes, a minimum software revision is required when installing this assembly.. This Wideband Digital IF Assembly is only present on instruments with option B1A, B1X or B85. Instrument specifications are unchanged.

Solution/Action:

The Instrument software must be revision A.13.12 or later for the Wideband Digital IF Assembly to function.

The latest N9020A MXA software can be down loaded for www.agilent.com/find/xseries_software
