Rev. 19

Agilent Technologies

Situation:

The current revision of the A12 Preselector requires different tuning delay compensation values than earlier A12 Preselectors. This change is prompted by variations in the manufacturing process and there is no affect on performance or specifications. O

Solution/Action:

Software revision A.11.03 or greater identifies the vintage of the A12 Preselector and applies the proper tuning delay compensation values.

The latest N9030A PXA software can be down loaded for www.agilent.com/find/xseries_software
