Serial Numbers: ALL

U3811A must be separated from the U3810A before servicing

Parts Required:
P/N   Description   Qty.

None

ADMINISTRATIVE INFORMATION

[[]] Calibration Required	PRODUCT LINE: GM
[X] Calibration NOT Required	AUTHOR: CD

ADDITIONAL INFORMATION:

Situation:
The U3811A BeagleBone Green (BBG) must be removed from the U3810A before servicing.

Solution/Action:
The U3811A is a mini computer that controls the U3810A Advanced IoT Training Kit and must be removed before servicing. Remove the U3810A from the platform, then remove the U3811A for service.

The procedure is documented at https://www. keysight.com/find/AdvancedIoT as both written instructions and a video demonstration.
